

**Environmental Quality Division  
Waiver for Grease Trap Pumping Frequency**

If your business would like to request a waiver from the grease trap pumping frequency in accordance with Article IX - **Section 13-154. Schedule of Service Required for Generators (d)**, then a formal written request must be submitted to the Environmental Services Director.

Mr. Jim Cummings  
Environmental Services Director  
201 NW 2<sup>nd</sup> Street, Suite 100  
Grand Prairie, Texas 75050

The written request must include the following information to be considered:

- 1) Name and address of facility and current pumping frequency
- 2) Size of the grease trap and whether this trap was sized for the current occupant.
- 3) Water Consumption information for the last three (3) months.
- 4) An explanation as to why a waiver is being requested.
- 5) Copies of the last 3 trip tickets and a signed statement from the liquid waste hauler detailing that less than 25% of the wetted height of the grease trap, as measured from the bottom of the grease trap to the invert of the outlet pipe, contained floating materials, sediment, oils or greases, using an approved measuring device such as the Sludge Judge during the last 3 pumping events.
