## WHEN CAN I GET A VACCINE?

Because the supply of COVID-19 vaccine in the United States is expected to be limited at first, the CDC is providing recommendations to federal, state, and local governments about who should be vaccinated first. And, the environment is fluid, with changes being made frequently at the state and county level. Currently, in Texas, the state considers front-line healthcare workers and residents of a long-term care facility as currently eligible to get a vaccine. At this time the city is not providing vaccinations to the public. For more information, visit the city’s website at [gptx.org/coronavirus](http://gptx.org/coronavirus).

### CURRENTLY VACCINATING

**Phase 1A**
- Healthcare workers
- Long-term care facility residents & staff
  (Available at pharmacies)

**Phase 1B**

  - Type 2 diabetes mellitus

### FUTURE VACCINATIONS

**Phase 2A**
- Critical infrastructure personnel
- Teachers and daycare workers

**Phase 3**
- Workers in industries and occupations important to the functioning of society

**Phase 4**
- General public

## WHERE CAN I GET A VACCINE?

You can search for places to receive a COVID-19 vaccine within your designated phase using the State of Texas provider locations link below, which shows healthcare providers who have physically received vaccines within Texas. This way, you can call your closest provider location to see if you qualify for a vaccination, if available, and to make an appointment.

**Vaccine availability changes week to week depending on allocations**
- Check with your physician
